

PUBP309: EDUCATION POLICY

Education in Colonial India

Nationalism to Dyarchy and Compulsory Education

1882-1936

Shivakumar Jolad
FLAME University

RISE OF NATIONALISM

PROSPECTS OF EDUCATED INDIANS AT THE END OF 19TH CENTURY

Higher education dominated by literary, and law stream (BA and MA)

- By 1883 -25,000 BA and MAs, out of 25,00,00,000 (25 crore population.) 1 per 10000.
- Independent professions like lawyers, teachers, journalists thrived.. They took up active interest in Indian politics and questioned socio-economic realities.

Practical education- engineering, natural sciences were limited.

- Manufacturing and trade required skills, and capital, which literary graduates did not have. Also, Indian industry could not compete with Britain.

High unemployment

- Career for Indians virtually closed... Higher ranks in Army , and Politics- defacto taken up by British.
- **Difficult to get into civil service (open since 1853)– expense of going to London, beliefs against crossing seas/black water**
- **Growing unemployment added fuel to the nationalistic sentiments**

INDIAN NATIONAL CONGRESS VIEW

representation and employment. In 1885 when the Indian National Congress, which Hume saw as a safety-valve to the growing discontent with the alien rule, was formed, it adopted "wider employment of the people in the public service", as one of "the three important questions" constituting "the chief planks in the Congress platform." Hardly any annual session of the Indian National Congress took place without a discussion on the subject of employment—"the most important key to our material and moral advancement" as Dadabhai Naoroji described it in the very first session, passing resolutions on it. In the session in 1900, Surendra Nath Banerjea quoted figures for Bengal to show how the Government of India was deliberately evading the various pledges and principles made in the Charter Act of 1833 and the Queen's Proclamation of 1858 regarding the employment of Indians in the public service. "If you look at the statistics...", Banerjea observed, "you will find that the higher offices, the bulk of the higher offices—I should not be guilty of the smallest exaggeration if I say that at least 90 per cent of the higher offices—are filled by Europeans and Anglo-Indians... Imperialists, somebody says; they may be imperialists or not but at any rate these Departments constitute the close preserve, the absolute monopoly of these gentlemen. We are excluded. And why? Because of our race. Our colour is our disqualification."

A O Hume

Dadabhai Naoroji

Surendranth Banerjea

RISE OF MILITANT NATIONALISM AND REACTION OF BRITISH RAJ

Lala Lajpat Rai, B G Tilak, Bipin Chandra Pal (Lal, Bal, Pal)- held extreme views against British administration. Aurobindo Ghosh in Calcutta help fierce attack against INC 1893.

1897: Damodar and Balkrishna Chapekar- killed Plague officer in Poona. Provoked invoking of **sedition law**

Lord George Hamilton (secretary of state for India) felt: *It was impossible to separate young men's extremist ideas and hatred of England from the higher education and training they received.*

- Raised sentiments against spreading of English Education in India.

Progress of Education between 1901-2 and 1921-22

Type of Institution	No. of Institutions		No. of Scholars	
	1901-2	1921-22	1901-2	1921-22
1. Universities	5	10	Figures not available	Figures not available
2. Arts College	145	165	17,651	45,418
3. Professional Colleges	46	64	5,358	13,662
4. Secondary Schools	5,493	7,530	6,22,768	11,06,803
5. Primary Schools	97,854	1,55,017	32,04,336	61,09,752
6. Special Schools	1,084	3,344	36,380	120,925
Total for Recognised Institutions	1,04,627	1,66,130	38,86,493	73,96,560
7. Unrecognised Institutions	43,081	16,322	6,35,407	422,165
Grand Total	1,47,708	1,82,452	45,21,900	78,18,725

CURZON ERA

LORD CURZON

Viceroy and Governor General of India (January 1899 –November 1905)

- Educated at Oxford. Person with great intellectual powers, infinite capacity for work, strong sense of duty

Achievements in almost all fields of administration

- Educational Reforms
- Police and Military Reforms- Police commission 1902
- Archeology: Ancient Monuments Act, 1904

Blunders

- **Partition of Bengal, 1905**
- Antagonized the educated intelligentsia beyond hope of reconciliation. Bad satirical vein and often spoke and wrote in a way that hurt the susceptibilities of people.-- :`**but undoubtedly truth took a high place in the moral codes of the West before it had been similarly honoured in the East..**”

Lord Curzon. (1859 –1925)

*My name is George Nathaniel Curzon,
I am a most superior person,
My cheek is pink, my hair is sleek,
I dine at Blenheim once a week*

(<https://www.britannica.com/biography/Lord-Curzon>)

EXTENT OF EDUCATION IN 1904

Population 240 million

5 Universities (Calcutta, Bombay, Madras, Punjab University (Lahore), Allahabad)

191 colleges spread through put India

5500 secondary schools.- 5.6 lakh students

98,000 primary schools- 3.3 million students

Including private schools 4.5 million students across India.

Only 1 in 5 villages had schools

1/4th of boys attended schools; 1/40 girls attended schools

Census 1901: Male Literacy 10% , female literacy just 0.7%

LORD CURZON AND HIGHER EDUCATION

Lamented that higher education in India was a failure.

- “Ours system of higher education in India is a failure. .. *The Indian University turns out only a discontented horde of office seekers whom we educated for places which are not in existence for them to fill*”

Planned to curb/control the spread of higher education.. (Quality v/s Quantity)

Key Educational Changes:

- **Indian Universities Act**
- First official announcement of Education Policy of Government of India
- **White Paper on Indian Education 1904**

INDIAN UNIVERSITY COMMISSION

1902 : 6 member commission was established. **Only one Indian member- Syed H Bilgrami**

Dissent came as there was no Hindu representative

Surendranath Banerjea (dismissed ICS officer and member of congress) opposed the committee. Many Hindus supported him.

Curzon bent to the popular opinion and sent request for including 5 local commissioners as members

B.A.s", the permanent members of the Commission were to be assisted by five local commissioners—Ashutosh Mukhopadhyay for Bengal, Sankaran Nair for Madras, Chandavarkar for Bombay and Lewis and Bell for the North Western Provinces and the Punjab respectively.

RECOMMENDATIONS OF INDIAN UNIVERSITY COMMISSION

Reduction in the size and charge of the university senates.

No new universities should be initiated.

The examination system should be revised and simplified.

Minimum age of matriculation recommended as sixteen.

Recognition to be granted to new schools only if certified by the Education Department.

A minimum rate for college fees should be established.

Teaching of law in Arts colleges should be revised.

Teaching of agricultural sciences should be encouraged.

Quality and status of courses in the Indian classical languages should be improved

INDIAN UNIVERSITY ACT 1904

Universities were empowered to appoint their own staff including the teaching staff

The **number of Fellows of a University** was limited within **50 to 100** and their tenure of office was reduced to five years

The number of elected Fellows was fixed at 20 for the Bombay, Madras and Calcutta Universities and 15 for others

Syndicate was accorded legal sanction with proper representation of **University teachers** on it

Rules pertaining to affiliation of Colleges to a University were made stricter

Government was empowered to modify the rules framed by the Senate

Governor-General in Council was authorized to define the territorial jurisdiction of the **Universities.**

OPPOSITION AND PASSING OF THE BILL

Widespread opposition to the recommendations by Indians (especially Bengali's). Curzon was regarded as a person for doom of higher education

1903- Bill was introduced –Sir Thomas Raleigh ((member of the Viceroy's Executive Council)

Faced stiff opposition from **G K Gokhale**, and Ashutosh Mukhopadhyaya

March 1904 the **Indian Universities Act** passed into law

Grant of Rs 5 lakhs a year for the universities to implement the provisions of the law

Ashutosh Mukherjee

VC of Calcutta University
1906-1914

"Tiger of Bengal"

A PERIOD OF TRANSITION (1905-21)

POLITICAL SCENARIO

1905+ Political unrest post- partition of Bengal..

- Swadeshi movement, Boycotting of foreign goods..

1906-Formation of Muslim League 1906

1909-Separate electorate for Muslims and Hindus

1909- Morley-Minto Reforms. (Indian Councils Act)

1911-Annuling of partition of Bengal; **New division on linguistic grounds (Assam, Orissa and Bihar**

1912-Shifting of capital to Delhi

1915- Gandhi Arrives in India

1919- System of Dyarchy introduced

1919- Jallianwala bagh massacre

Quest for National Education emerges

The swings of the pendulum in official policies between 1882 (when the Report of the Indian Education Commission was submitted) and **1921 (when education was transferred to Indian control under the Government of India Act, 1919)** are worth noting.

Coronation of King George – V: 1911
Delhi Durbar

GENESIS OF NATIONAL EDUCATION PRIOR TO CURZON

Goordoo Banerjee- Vice chancellor of Calcutta University- 1882 drew attention to the problems faced in education system set up after the Education Despatch of 1854. **Called for introduction of mother tongue. University fellowship for original research in vernacular languages**

Rabindranath Tagore- *Shiksha Her Fer* (Dec 1892) - The Mismatch of Education; ; pointed inadequacy of the prevailing system of education.. **Pleaded for Bengali as medium of Instruction.**

Muslim education: Darul Uloom – Deboand , set up in 1866 in Sahranpur, UP... (Orthodox Muslim university). Lucknow- **Darul-Uloom Nadwatul Ulema**- (Institutes of Islamic scholarship) set up in 1898.. More modern in educational outlook.

Bhikaji Rustom Cama

FIRST UPHEAVAL

After Partition of Bengal: Govt. stopped students participating in political activities

- Society for the Promotion for National Education in Bengal- Gurudas Banerjee

- Calcutta Congress (1906): nation wide campaign education for girls and boys - literary, scientific and technical- 11 high schools in Bengal and 40 in East Bengal- outside Bengal only Samarth Vidyalaya in Talegaon Pune*

-Early 1920- Lala Lajpatrai:

- National Education strangled by T. Palit and Sir. Rash- when they gave their endowment to Calcutta University and not to National Council of Education

- Scholars who gave up their careers for National education- were seeking Govt jobs

Movement : a discarded landmark in educational progress of the country

Rabindranath Tagore- Shiksha Her Fer (Dec 1892) - The Mismatch of Education; ; pointed inadequacy of the prevailing system of education.. Pleaded for Bengali as medium of Instruction.

CHARACTERISTICS OF NATIONAL EDUCATION

1. **Indian Control**: ideals, devotion, wisdom, morality and **religious spirit**
2. Teaching **love of motherland**: **Patriotism**, embracing Indian history, art, science politics, legacies of war, trade and commerce
3. No **need for imitation of England**- India to be evolved as mightier India- feel proud of the past and traditions, not a beggar-**equal partner with other nations, contribution for world culture and thought** : all these attitudes to be developed through national education (extreme national and anti-national views always existed*)
4. No domination of English- Gandhi: **Adoption of Hindustani as national language**
5. **Vocational education**: development of economics: trade and industry
(Machine development was also condemned on religious and spiritual grounds*)

Annie Besant

GANDHI- HIND SWARAJ, 1909

Hind Swaraj or Indian Home Rule

18. EDUCATION

Reader : In the whole of our discussion, you have not demonstrated the necessity for education; we always complain of its absence among us. We notice a movement for compulsory education in our country. The Maharaja Gaekwar has introduced it in his territories. Every eye is directed towards them. We bless the Maharaja for it. Is all this effort then of no use?

The ordinary meaning of education is a knowledge of letters. To teach boys reading, writing and arithmetic is called primary education. A peasant earns his bread honestly. He has ordinary knowledge of the world. He knows fairly well how he should behave towards his parents, his wife, his children and his fellow villagers. He understands and observes the rules of morality But he cannot write his own name. What do you propose to do by giving him a knowledge of letters ? Will you add an inch to his happiness? Do you wish to make him discontented with his cottage or his lot? And even if you want to do that, he will not need such an education. Carried away by the flood of

Now let us take higher education. I have learned Geography, Astronomy, Algebra, Geometry, etc. What of that ? In what way have I benefited myself or those around me? Why have I learned these things ? Professor Huxley has thus defined education: "That man I think has had a liberal education who has been so trained in youth that his body is the ready servant of his will and does with ease and pleasure all the work that as a mechanism it is capable of;

Reader : If that is so, I shall have to ask you - another question. What enables you to tell all these things to me? If you had not received higher education, how would you have been able to explain to me the things that you have?

Editor : You have spoken well. But my answer is simple: I do not for one moment believe that my life would have been wasted, had I not received higher or lower education. Nor do I consider that I necessarily serve because I speak. But I do desire to serve and in endeavouring to fulfill that desire, I

NATIONAL COLLEGE, HIGH SCHOOLS

National Council on Education – was organized Bengali nationalists financed by Zamindars..

Bengal National College, set up in **1906**. – **Aurobindo Ghosh** as principal.. Vernacular was primary medium of instructions. English was taught. Encouragement to scientific and technical education was given..

Many **National High Schools** (50) were set up..

- Samarth Vidyalaya Poona
- **National High School Bangalore- 1917**

Establishment of Colleges and Universities

- Jamia Milia Islamia (JMI)- 1920
- **Banaras Hindu University (BHU)- 1916**
- **Gujarat Vidyapith (GV)- 1920**
- Kashi Vidyapith- 1921

Estd. 1921

PROBLEMS FACED BY NATIONAL EDUCATION

Problems of: organization and execution-

Building of the institutions

Specially trained teachers

Building of new curriculum

Persuading Parents

Social recognition of degrees and diplomas from national institutions

Huge funds needed

These didn't workout due to the mentioned problems

National school movement came to an end with the end of Non cooperation movement due to Chaura Chauri incident 1922.

GENERAL REVIEW OF EDUCATION 1855-1921

GENERAL REVIEW OF EDUCATION 1854-1921

1854- Woods's Education Despatch – First comprehensive education policy of India, spanning all levels of Education

1857- setting up of Universities in India, expansion 1916 onwards

Rapid expansion in primary (local bodies) and secondary education (Grant in Aid), College education expansion

Hunters Commission – 1882 review and recommendations- doctrine of state withdrawal

Impact of **Victorian Era**: Political Awakening, Social and Religious Reforms

Lord Curzon Reforms-

- Indian Universities Act 1904
- Paper on Primary education

Growth of National Education

Calcutta University Commission, Expansion of Universities

CREATION OF NEW UNIVERSITIES 1917-22

No new Universities from 1887-1916.

8 new Universities in a short period

Universities in

- **Mysore-** 1916 (For Mysore and Coorg)
- **Patna** – 1917 (For Bihar and Orissa)
- **BHU** (Benares)- 1917 , Pt. Madan Mohan Malaviya
- **Aligarh Muslim University** – 1920 (Mohomedian Anglo-Oriental College, - Sir Syed Ahmed Khan)
- **Dacca-** 1920
- **Lucknow-** 1920
- **Osmania-** 1918 (From Hyderabad Nizam)- Urdu medium University
- **Delhi** -1922

Thanks to Calcutta University Commission (Sadler Commission)-

EXPANSION OF EDUCATION 1855- 1921

Great **expansion of the modern system of education** between 1854 and 1921

The **indigenous system of education** mostly **disappeared** during the period

By 1921-22, the unrecognized institution—which term includes all the known educational institutions outside the State system numbered only 16,322 with only 422,165 pupils.

	1855	1921-22
1. Universities	—	10
2. Arts Colleges	21	165
3. Professional Colleges (the figures of 1855 under this head include Professional Schools other than Normal Schools)	13	64
4. Secondary Schools	281	7,530
5. Primary Schools	2,810	1,55,017
6. Special Schools	7	3,344
7. Total number of recognised institutions	3,132	1,66,130
8. Total number of scholars in recognised institutions	1,35,079	73,96,560
9. Total expenditure on Education	Rs. 9,99,898	Rs. 17,35,88,099
10. Govt. expenditure on Education	Not known; but most of the above amount was expended by Government.	8,56,01,366

N.B.—The figures for 1855 are taken from the *Report of the Indian Education Commission*, General Table No. 1a. Those for 1921-22 are for British India only, exclusive of Burma.

DISMAL LITERACY SPREAD

N&N believes Quantitative expansion was not significant

1921- Education was still confined to minority

Percentage of literacy was low

Change in attitude towards education of women, and lower castes

Political and social awakening

	<i>Adam's Figures</i> (Taken from his intensive studies of six Thanas in the third report. <i>Vide</i> Chapter I)	<i>Position of British India in 1921-22</i> (Burma is excluded.)
(a) Centres of Instruction, i.e., Schools—public and domestic—as given by Adam and schools—recognised and unrecognised—as given in Departmental Reports	2,210 (1 for 225 persons)	1,82,752 (1 for 1,280 persons)
(b) Pupils under instruction	6,786	78,18,725
(c) Percentage of pupils under instruction to the total population (This ought to be about 15 per cent.)	1.4	3.3
(d) Number of Adult literates, ¹ above the age of 15. (Adam's figures are for literates above the age of 14.)	21,911	1,24,60,170
(e) Percentage of Adult literates to the total population	4.4	5.2

¹Figures given here are for whole of British India excluding Ajmere-Merwara, Andamans and Nicobars, British Baluchistan, Coorg and Delhi for which figures are not available.

CAUSES OF INADEQUATE QUANTITATIVE EXPANSION

Intrinsic difficulties of the problem and the waste and ineffectiveness involved in the educational system.

Large increase in population; High birth-rate which added millions to the number of those to be educated;

Wastage due to stagnation, deaths, premature withdrawals from schools, etc, so that only a very small minority of the children enrolled in schools attained literacy;

Lapse into illiteracy on the part of those who had once been made literate, owing to lack of suitable environment for the maintenance of literacy;

Intrinsic difficulties of the problem such as scattered population centres, poverty, apathy of the people, multiplicity of castes, creeds, languages, etc

OTHER SCHOOL OF THOUGHT SYSTEMIC FAILURES

Almost complete disappearance of indigenous systems of education;

Lack of adequate funds;

Emphasis on the development of Collegiate and secondary education which necessarily involved, on financial grounds, **a neglect of primary education;**

Emphasis on departmental institutions (which were necessarily costlier) rather than on private institutions which would have enabled Government to achieve expansion at a lesser cost;

Emphasis on quality rather than on quantity particularly in the sphere of primary education;

Neglect of modern Indian languages; Adoption of English as the medium of instruction;

Absence of compulsory primary education.

QUALITATIVE ACHIEVEMENTS OF THE STATE OF EDUCATION

Substituted a newer and comparatively **more efficient system of education for the indigenous institutions**, both elementary and higher

- **Curriculum is broader and more liberal**; the methods of teaching are better and more modernized; the use of printed books is a definite asset;
- it is complained that the **modern primary school has lost the elasticity of the indigenous system**, and that *it is not as finely adjusted to the needs and requirements of the rural population as the indigenous system was.*

There is a **world of difference between the modern secondary schools, colleges, and universities on the one hand and the *tols*, the *pathshalas*, and the *madrassahs* on the other.**

Initial years: Undeserved contempt of oriental learning – and undeserved glorification of western learning... Later- Indian universities began to **cultivate rational and scientific studies of the Oriental classical languages.**

Stimulus to the national mind of India
