	Vidhan Parishad (Legislative Assembly)											
Local	District Panchayat, Intermediate Panchayat, Village Panchayat (rural areas) Nagar Panchayats, Municipalities, City Corporations (urban)	Village courts (Exist in a few states only)	Panchayat President, Pramukh, Pradhyan, Sarpanch		District CEO/ District Magistrate, Block Development Officer, Panchayat Secretary							

Council

Council is Generally elected
Probably has a "term" or a limit of time

Commission

Commission is usually appointed by a government body- Members aren't usually elected

Committee

Subgroups of the original body.
They are formed for a specific purpose.
Report back to the main group

EDUCATION COMMISSION 1964-66

Also known as Kothari Commission

No country, whatever its stage of economic development, can in the modern world afford to do anything less than provide primary education to all its people. That is essential to survival and development .

- Daulat Singh Kothari

(Former UGC Chairman, Eminent Scientist,
Architect of scientific Institutions in India)

**EDUCATION
AND
NATIONAL DEVELOPMENT**

**REPORT OF THE
EDUCATION COMMISSION, 1964-66**

EDUCATION AND NATIONAL DEVELOPMENT

1.01 The destiny of India is now being shaped in her classrooms. This, We believe, is no mere rhetoric. In a world based on science and technology it is education that determines the level of prosperity, welfare and security of the people. On the quality and number of persons coming out of our schools and colleges will depend our success in the great enterprise of national reconstruction the principal objective of which is to raise the standard of living of our people. in this context, it has become urgent

- to re-evaluate the role of education in the total programme of national development;

FEATURES AND OBJECTIVE

17 members: Among the members of the commission **5 educationists were from England, America, France, Japan and Russia. J.P. Naik was appointed as member secretary of the commission** and J.F McDougall as associated secretary.

Committee took a **comprehensive review of the Entire Educational System.**

Indian education needs a drastic reconstruction almost a revolution, if the country is to realise its long-term goals stated in the Preamble to the Constitution or to meet the problems facing it in different sectors.

“The destiny of India is now being shaped in her classrooms. This, we believe, is no mere rhetoric. In a world based on science and technology, it is education that determines the level of prosperity, welfare and security of the people. On the quality and number of persons coming out of our schools and colleges will depend our success in the great enterprise of national reconstruction, the principal objective of which is to raise the standard of living of our people.”

MEMBERS OF THE EDUCATION COMMISSION

Chairman

1. PROFESSOR D. S. KOTHARI, Chairman, University Grants Commission, New Delhi.

Members

2. Sum A. R. DAWOOD, formerly Officiating Director, Directorate of Extension Programmes for Secondary Education, New Delhi.

3. MR. H. L. ELVIN, Director, Institute of Education, University of London, London.

4. SHRI R. A. GOPALASWAMI, Director, Institute of Applied Manpower Research, New Delhi (since retired).

5. PROFESSOR SADATOSHI IHARA, School of Science and Engineering, Waseda University, Tokyo.

6. DR. V. S. JHA, formerly Director of the Commonwealth Education Liaison Unit, London.

7. SHRI P. N. KIRPAL, Educational Adviser and Secretary to the Government of India, Ministry of Education, New Delhi.

8. PROFESSOR M. V. MATHUR, Professor of Economics and Public Administration, University of Rajasthan, Jaipur (now Vice-Chancellor, Rajasthan University).

9. DR. B. P. PAL, Director, Indian Agricultural Research Institute, New Delhi (now Director-General, and Vice-President, Indian Council of Agricultural Research and Additional Secretary to the Government of India, Ministry of Food and Agriculture).

11. PROFESSOR ROGER REVELLE, Director, Centre for Population Studies, Harvard School of Public Health, Harvard University, Cambridge, USA.

12. DR. K. G. SAIYIDAIN, former Educational Adviser to the Government of India (now Director, Asian Institute of Educational Planning and Administration, New Delhi).

14. PROFESSOR S. A. SHUMOVSKY, Director, Methodological Division, Ministry of Higher and Special Secondary Education, RSFSR, and Professor of Physics, Moscow University, Moscow.

15. M. JEAN THOMAS, Inspector-General of Education, France, and formerly Assistant Director-General of UNESCO, Paris.

Member-Secretary

16. SHRI J. P. NAIK, Head of the Department of Educational Planning, Administration and Finance, Gokhale Institute of Politics and Economics, Poona.

Associate Secretary

17. MR. J. F. MCDOUGALL, Assistant Director, Department of School and Higher Education, UNESCO, Paris.

UNIQUE FEATURES

Unique features of the report:

- ❖ Has a **comprehensive** review of the Entire Educational System.
- ❖ The conviction that education is the most powerful instrument of the national development

The report was divided into 4 sections:

- General problems
- Education at **different stages** and in **different sectors**
- Implementation of various **recommendations** programmes suggested by commission
- Supplementary papers

EDUCATION STRUCTURE

Basic Structure: 10+2+3.

One to three years of pre-school education.

A primary stage of 7 to 8 years divided into a lower primary stage of 4 or 5 years and a higher primary stage of 3 or 2 years.

A lower secondary stage of 3 or 2 years of general education or 1 to 3 years of vocational education.

A higher secondary stage of 2 years of general education or 1 to 3 years of vocational education, 50% of the total would be under vocational education,

A higher education stage of 3 years or more for the first degree course followed by courses of varying durations for the second or research degrees.

School Category

P (1-5)

P+UP (1-7 /1-8)

P+UP+SS+HSS (1-12)

UP (6-7/6-8)

UP+SS+HSS (6-12)

P+UP+SS (1-10)

UP+SS (6-10)

SS (7-10/ 8-10)

SS+HSS (8-12/9-12)

HSS (11-12)

MAIN RECOMMENDATION

Science Education

Work experience:

Vocational Education

Common School System

Social and National Service

Language Policy

Education in Social Moral and Spiritual Values.

COMMON SCHOOL SYSTEM- RATIONALE

In a situation of the type we have in India, it is the responsibility of the educational system to bring the different social classes and groups together and thus promote the emergence of an egalitarian and integrated society.

...instead of doing so, *education itself is tending to increase social segregation and to perpetuate and widen class distinctions.*

There is thus segregation in education itself-the minority of private, fee-charging, better schools meeting the needs of the upper classes and the vast bulk of free, publicly maintained, but poor schools being utilized by the rest.

segregation is *'increasing and tending to widen the gulf between the classes and the masses.*

By segregating their children, *such privileged parents prevent them from sharing the life and experiences of the children of the poor and coming into contact with the realities of life.* In addition to weakening social cohesion, they also render the education of their own children anemic and incomplete

COMMON SCHOOL SYSTEM OF PUBLIC EDUCATION

Which will be open to all children, irrespective of **caste, creed, community, religion**, economic conditions or social status;

where **access to good education will depend not on wealth or class but on talent**;

Which will maintain adequate standards in all schools and provide at least a reasonable proportion of quality institutions;

in which no tuition fee will be charged; and

which would meet the needs of the average parent so that he would not ordinarily feel the need to send his children to expensive schools outside the system

SCHOOL COMPLEX

An Ideal School Complex / Cluster

The linking of secondary and primary schools under this programme can be done in two tiers.

- In the first tier, **each higher primary school** should be integrally related to the **eight to ten lower primary schools** that exist in its neighbourhood so that they form one complex' of educational facilities. The headmaster of the higher primary school should provide an extension service to the lower primary schools in his charge, and it will be his responsibility to see that they function properly
- The **second tier would be a committee under the chairmanship of the head-master of the secondary school** (all headmasters of the higher and lower primary schools in the area being members) which will plan the work and give guidance to all the schools in the area

PLANNING THE LOCATION OF SCHOOLS

(a) Location of open and proposed high schools

(b) Distribution of school-age population

Proper location will **avoid waste and duplication**, and size is **related intimately to cost and efficiency**.

The optimum size of a school is for a **lower primary school-4 or 5 teachers and an enrolment of 160 to 200, i.e., a school of 4 or 5 classes**; and for a **higher primary school, a school of 7 or 8 classes, a teacher for each class (excluding the headmaster) and an enrolment of 300-400**.

We feel, however, that the establishment of larger and more efficient primary schools would be facilitated if people could be persuaded to **accept mixed schools at the primary stage and if small neighbouring villages could be induced to share a bigger and more efficient school in common**, instead of insisting on their own schools, however small.

A long-term **goal should be to merge these (small) villages into bigger ones**.

NEP DRAFT 2019- SCHOOL COMPLEX

Challenges of small schools: nearly 28% of India's public primary schools and 14.8% of India's upper primary schools have less than 30 students (UDISE).

One possible mechanism for accomplishing the above would be the establishment of **school complexes**, consisting of one secondary school together with all other schools offering lower grades in its neighbourhood, in a radius of five to ten miles, was first enunciated by the Education Commission (1964–66) but was left unimplemented.

The school complex will become the basic unit of educational administration of the public school system, and will be developed accordingly.

The principal of the secondary school will be the head of the school complex. S/he will be endowed with administrative, financial and academic powers to oversee the coordinated development of all the schools within the complex.

6% SAGA OF KOTHARI COMMISSION

'the most difficult part of our task, namely to estimate the magnitude of resources likely to be available during the next 20 years, and the best manner of their allocation to different sectors of education

- 'we should accord the highest priority to education and the largest proportion of GNP (Gross National Product) to it'

public spending on **education should be at least 6 per cent of Gross Domestic Product (GDP)**

मराठी मराठी हिन्दी
ગુજરાતી తెలుగు లిపి മലയാളം
भाषा বাংলা
ଓଡ଼ିଆ ଶାସ୍ତ୍ର ಕನ್ನಡ संस्कृतम्
விக்கிப்பீடியா འུ་ འུ་ অসমীয়া

LANGUAGE POLICY

Which language to be adopted for binding the education across the multilingual stretch of the country?

in 1956 the Central Advisory Board of Education (CABE) gave *three language formula* (TLF) which was accepted by conference of chief ministers in 1961.

Kothari Commission TLF: As per TLF, the students have to study the three languages for 3 to 6 years.

- **The mother tongue is used as the medium of instruction (MOI) for primary stages**
- **higher primary stage introduces the union language (Hindi) as the second language** (For speaking students it will be English or modern European language Hindi). Optional third language apart from these should be provided.
- **At lower secondary stage all of them should be made compulsory**

Lower secondary: all three
languages

Higher Primary: Union
language (Hindi)/English
/Modern European Language

Mother tongue as MOI at
primary

NATIONAL POLICY ON EDUCATION 1968

Formed on the basis of the recommendations of the Kothari Education Commission 1964-66.

Free and Compulsory Education –

- Strenuous efforts should be made for the early fulfillment of the Directive Principle under Article 45 of the constitution seeking to provide free and compulsory education for all children up to the age of 14.
- Suitable programmes should be developed to reduce the prevailing wastage and stagnation in schools and to ensure that every child who is enrolled in school successfully completes the prescribed course.

Development of languages –

- **Regional Languages:** The use of regional languages should not be only at the primary and secondary stages, but urgent steps should be taken to adopt them as media of education at the university stage.
- Three-Language Formula : secondary stage,
- Hindi, Sanskrit and International Languages

Equalisation of Educational Opportunities –

- Strenuous efforts should be made to equalise educational opportunity.
- **Regional imbalances in the provision of educational facilities should be corrected** and good educational facilities should be provided in rural and other backward areas.
- To promote social cohesion and national integration in the **common school system** as recommended by the Education Commission should be adopted.

EDUCATION- 1976-1992

EDUCATION — CONCURRENT SUBJECT

Forty-second Amendment of the Constitution of India- 1976 , during emergency period

The **most controversial amendment of all time**: Curbed the power of Judiciary , power to try the members of parliament

Amendment of the Preamble.- In the Preamble to the Constitution,-

(a) for the words "SOVEREIGN DEMOCRATIC REPUBLIC" the words "SOVEREIGN **SOCIALIST SECULAR** DEMOCRATIC REPUBLIC" shall be substituted;

57. Amendment of the Seventh Schedule.-In the Seventh Schedule to the Constitution,(a) in List I.-Union List, after entry 2, the following entry shall be inserted, namely:-

- "**25. Education, including technical education, medical education and universities, subject to the provisions of entries 63, 64, 65 and 66 of List I; vocational and technical training of labour.**";

THE CONSTITUTION (FORTY-SECOND AMENDMENT) ACT, 1976

A Constitution to be living must be growing. If the impediments to the growth of the Constitution are not removed, the Constitution will suffer a virtual atrophy. The question of amending the Constitution for removing the difficulties which have arisen in achieving the objective of socio-economic revolution, which would end poverty and ignorance and disease and inequality of opportunity, has been engaging the active attention of Government and the public for some years now.
